

BLACK LABEL

THE WORLD'S BEST LUMBER

Black Label™ FSC Certified Deck Tiles

ITAUBA

CUMARU

IPE

Black Label™ Deck Tiles are Ideal for poorly ventilated deck applications like roof decks or conventional decks built close to grade.

Tropical Forest Products offers Black Label™ FSC Certified Deck Tiles in 24"x24 for those customers desiring to receive 1 LEED credit under USGBC guidelines.

FSC Certified tile options include Itauba (Stock) , Cumaru, and Ipe (Special Order).

Itauba, Cumaru and Ipe are very similar in color. Itauba, Cumaru and Ipe will all weather naturally to a grey patina over time if left un-finished.

Itauba, Cumaru and Ipe share very similar technical performance characteristics including same class ratings for durability, resistance to insects and fire.

Black Label™ Deck Tiles are offered with a smooth deck board surface only and are naturally slip resistant.

Grooved decking surfaces are not recommended...Why?

Grooved surfaces reduce surface area contact with shoes and are more difficult to clean. Grooves support the collection of food and dirt which encourages fungi growth further reducing slip resistance.

Black Label™ Deck Tiles are rated to carry a live load of 100 psf.

Black Label™ Deck Tiles are designed to be installed over roofs, asphalt or concrete, old decks on or in new deck constructions. Installation labor costs are lowered significantly when using modular deck panels.

Adjustable 3/8" to 1-3/8" Elevation™ Star Pedestals
Self-Leveling 1.25" to 20" Screw Jack Pedestals
Wood or Metal Stringers.

*Use of Cleaning or Finishing products on Black Label™ Deck Tiles in roof applications is not recommended without consulting product
