WeAreTropical.com

We are Tropical

Tropical Forest Products is a team of passionate people who love everything about forests and their survival. We know that adding value to the world's most renewable resource protects it from conversion to non-forest use, such as agriculture and cattle ranching. That's why we not only support environmental initiatives such as FSC® certification, but also take it a step further through our comprehensive Legal Lumber™ Due Care Environmental Compliance Program.

Ask about our FSC® certified products.

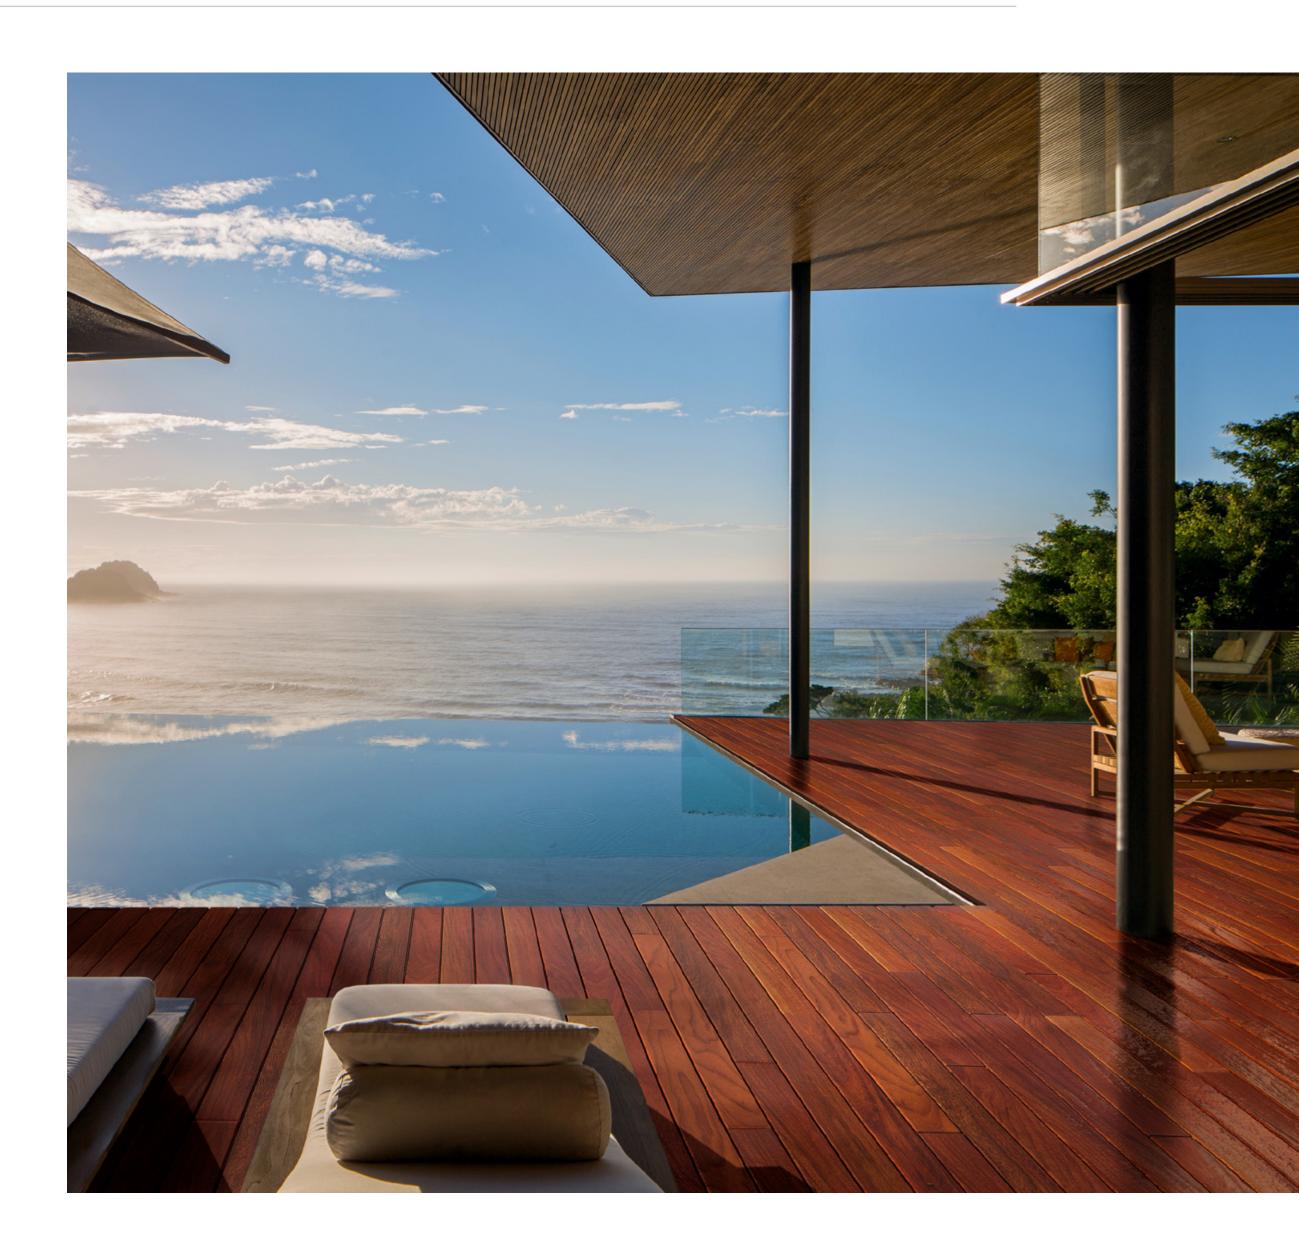

We buy direct from the source.

Visit our website

WeAreTropical.com

When it comes to wood, it's easy to go with Tropical Forest Products because we have the experts, the relationships and the inventory. We specialize in sourcing and supplying over 50 domestic and exotic wood species. From rough-sawn or milled lumber to flooring, decking, cladding systems, paneling, timbers, guardrails, architectural millwork, wood components, or anything else you can think of.

Tropical Forest Products has what you need, whether it's decking for famous boardwalks around the world or a custom architectural millwork package.

Designed by nature, crafted by Tropical

Born from the world's most renewable resource, the astonishing beauty of each board we sell can only be designed by nature. We hand-select only the highest quality timber. Our wide variety of stylish and natural products is as unique as the trees and forests they come from and our customers' visions for them.

Search for our inventory

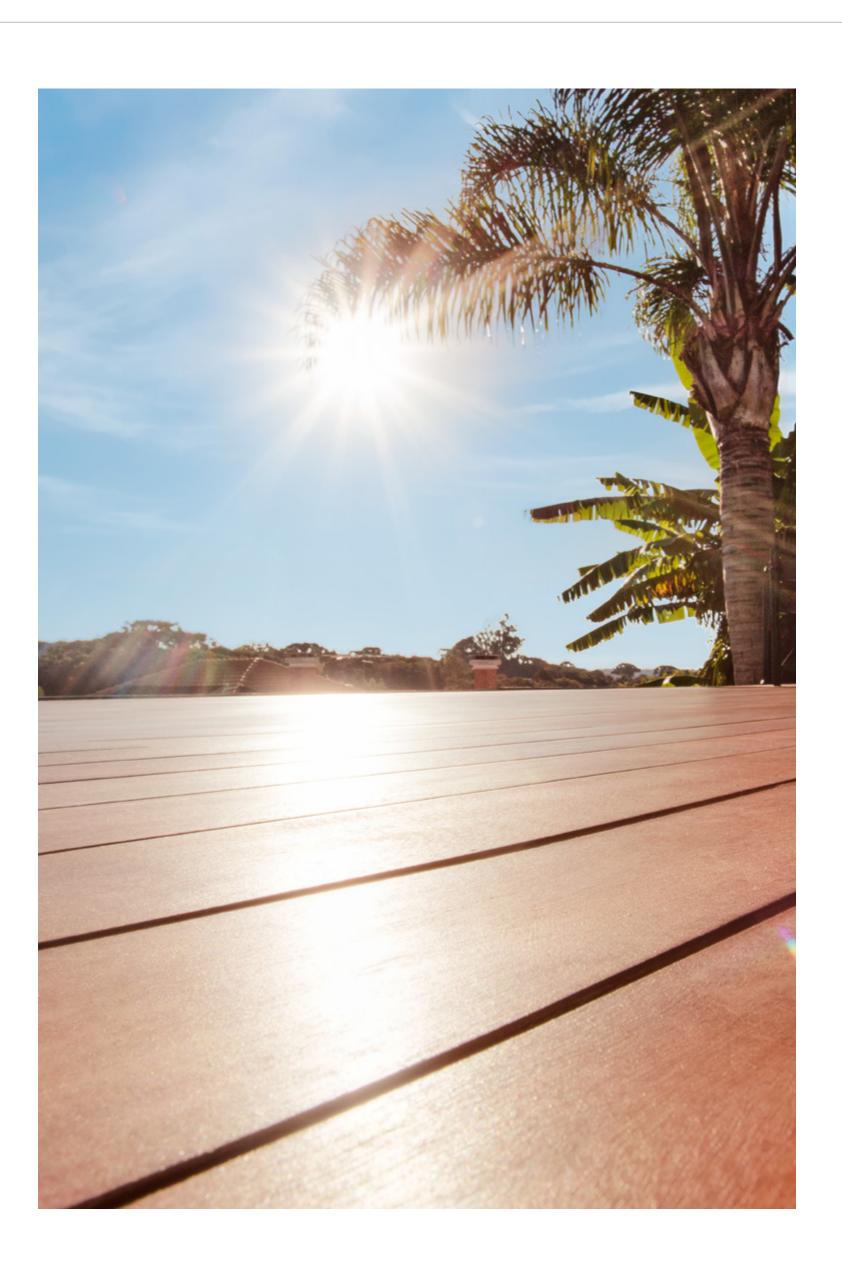

WeAreTropical.com

Go fast, go Tropical

Do you need lumber as soon as possible?

Give us a call and experience fast and efficient shipping. Our staff works hard to have the world's finest lumber shipped at the speed your projects require.

Time tested

Made from the only truly renewable resource, naturally durable wood products have been around since the dawn of construction. While other alternatives continue to improve, performance results have varied and most of these products are derived from non-renewable resources. Lumber, however, has always withstood the test of time.

Exceptional Customer Service

Not sure what you need?

Give us a call and discover the convenience of having a wood specialist guide you through our wide variety of species. We will be more than happy to answer any questions you may have!

WeAreTropical.com

Legal LumberTM: sustaining the forests & supporting communities

Our industry-leading Legal Lumber™ Due Care Environmental Compliance Program ensures that the timber we sell is sourced legally through a chain-of-custody auditing process that tracks products from the forest floor to your door. Additionally, we also promote the life cycle environmental benefits of using wood, the worlds only truly renewable resource, as a building material and support the efforts of other initiatives, organizations, and laws designed to support global forest sustainability and the protection of human rights.

Color & Grain

Tropical Forest Products decking products are available in a variety of species, colors, and grains. Take your pick.

Over time, the sun will change the appearance of the wood decking and cladding from its original color to a stunning silver-grey patina unless it is maintained with periodic cleaning and resealing.

Best practices

If your goal is to maintain a natural finished wood appearance, we recommend bi-annual cleaning in the spring and fall while the temperatures are above 50 degrees Fahrenheit. The beauty of wood is that no matter how old it is, it can always be returned to its natural color. Simply wash it with oxalic acid wood brightener or sand it, and voilà, it looks good as new. For a more in-depth look at the best installation and maintenance practices, check out our Best Practices Guide.

WeAreTropical.com/Resources

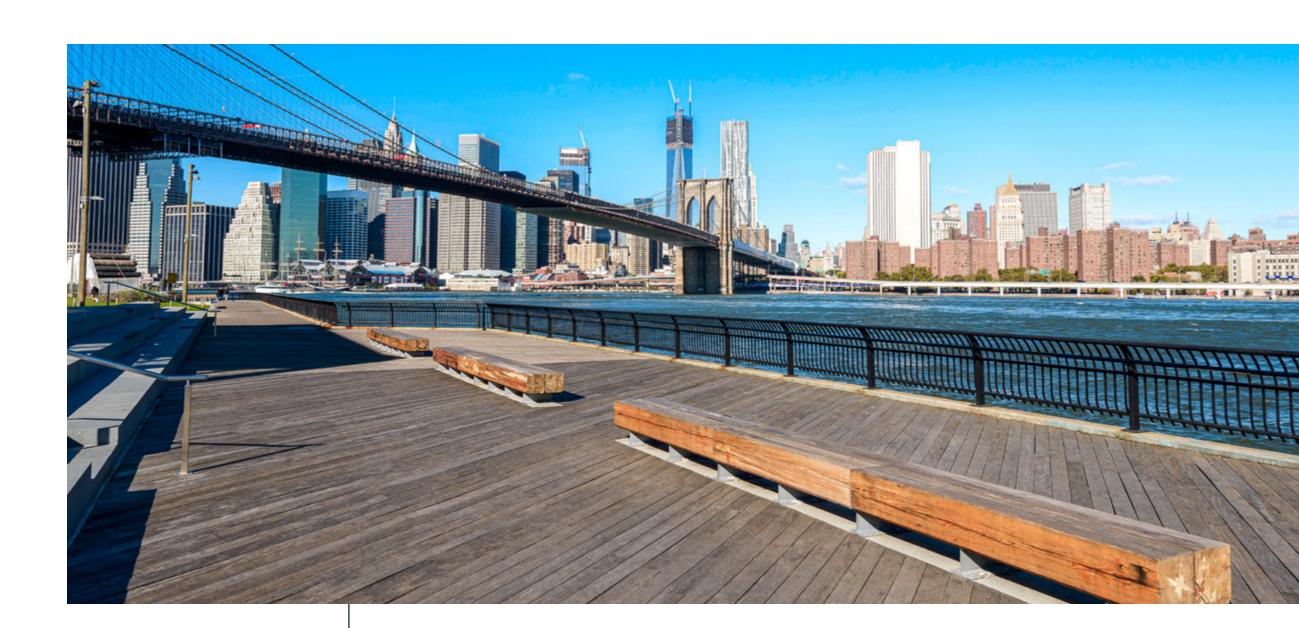

Description

Tropical Forest Products keeps **first-class Timbers and Heavy Section Decking** stocked for marine, industrial, and commercial applications like boardwalks, piers, bridges, fenders, sheet piling, RR Ties, crane mats, guardrails, arbors, sunscreens, and any other challenging applications where large sections and long lengths are required.

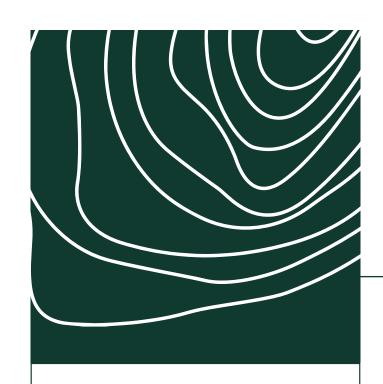

Our species include Ipe, Cumaru, Angelim, and Ekki, and they combine building practices with sustainable, affordable, and modern engineering. Even the U.S. Army Corps of Engineers recognizes the life cycle, cost, and environmental benefits associated with naturally durable hardwood construction.

Architectural Millwork

Tropical Forest Products offers a full range of services such as dressed two sides, dressed four sides, resawing, ripping, precision cuts, and custom molds. Our CNC moulder delivers consistent and accurate cuts for even the most complex profiles. Contact our staff for millwork for your custom project. We have immediate availability for any desired profile in any dimension up to 4-inches x 12-inches.

GrandReserve LIMITED EXOTIC LUMBER

- Description

Grand Reserve is Tropical Forest Products' newest and most exclusive line of specialty high-end exotic hardwoods, available only while inventory lasts.

- Species

Granadillo Ziricote Katalox Bocote Bubinga African Padouk
