

THE BOARDWALK AT THE AUDUBON CENTER AT
FRANCIS BEIDLER FOREST – HARLEYVILLE, SC

PROJECT PROFILE

I was so impressed with the quality of our Tropical Forest Products Cumaru. 7000 running feet worth of total boardwalk (decking, rails, piles, joists, and headers) and no sign of a knot anywhere! The folks at Tropical Forest Products were extremely knowledgeable about the entire spectrum of tropical hardwoods and guided us to the right choice for our specific needs. We are confident that Cumaru was not only the most environmentally friendly choice, but over the anticipated life-expectancy of the walk, will also be the most economical choice as well!

Michael Dawson – Center Director
The Audubon Center at Francis Beidler Forest
