PROJECT PROFILE

Brian,

We just opened our boardwalk in Sept. at our Hummingbird Migration Celebration and Nature Festival. The new boardwalks were a crowd favorite. The Tropical Forest Products Ipe decking you supplied for our boardwalk looks fantastic. Having never worked with Ipe before, I certainly understand why you call it Tropical Forest Products. I also appreciate your help in documenting the experience and environmental stewardship of Tropical Forest Products which helped our selection process for a vendor. I would not hesitate to recommend Tropical Forest Products to others.

The top rails along the boardwalk are Eastern Red Cedar with fitted rebar panels and cypress caps. A local welder simply took our vision of entangled vines.

Sincerely,
Walter Hubbard
