DARK RED BALAU DECKING

Tropical Forest Products Dark Red Balau Decking

A Value Alternative To Tropical Forest Products Ipe... When our customers are looking for a value option to Tropical Forest Products Ipe one option to consider is Tropical Forest Products Dark Red Balau. Dark Red Balau's rich Mahogany colors lend unique beauty to any outdoor project.

Time Tested ... Time tested in the real world as well as the laboratory, Tropical Forest Products Dark Red Balau™ has a proven natural resistance to the elements without the use of chemicals or coatings..

Easy to Care For – Hard to Resist... Tropical Forest Products Dark Red Balau decking can be left to weather naturally to an attractive silver grey requiring only the occasional cleaning. Or you can choose the option of maintaining the woods natural rich color by cleaning and refinishing as required, not unlike polishing your favorite piece of furniture. And unlike composite decking, Tropical Forest Products can always be restored to their original appearance because the woods natural beauty runs through and through.

The Difference is in the Grade – We Set the Standards... Dark Red Balau like any other species of wood, is produced to different grade and quality standards. In the absence of official grading rules for hardwood decking, Tropical Forest Products set its own standards over 40 years ago. Much like Kleenex® or Escalator®; Consumers, Architects and Building professionals recognize that Tropical Forest Products Premium Select Architectural Grade represents the bench mark for quality and consistency in what has become commonly known as the Tropical Forest Products decking category.

The Brand that Launched an Industry – Tropical Forest Products Stands Apart... Superior in physical properties but equal in durability to Genuine Mahogany, Dark Red Balau is one of the strongest and hardest timber species on the market.

Legal Lumber...Build with Conscience™ - Tropical Forest Products brand products have an environmental reputation you can build on ... Tropical Forest Products established and complies with a strict set of environmental standards that go beyond compliance with domestic and international laws and regulations and third party certification programs pertaining to the legal harvest and trade of timber products. Legal Lumber guidelines address the full 'Life Cycle Environmental Impact' of a material from cradle to cradle verses alternative materials. Additionally Tropical Forest Products Dark Red Balau Decking and Cladding Rain Screen products produced using chain of custody tracking technology. From forest floor to your door Legal Lumber guarantees an intact chain of custody and legal verification. Our purchasing decisions are a reflection of our values and define our very nature. We invite you to learn more about the standards that set Tropical Forest Products brand products apart from the competition.
