FSC CERTIFIED DECK TILES

Tropical FSC Certified Deck Tiles

CUMARU

IPE

Tropical Deck Tiles are Ideal for poorly ventilated deck applications like roof decks or conventional decks built close to grade.

Tropical offers FSC Certified Deck Tiles in 24"x24" for those customers desiring to receive LEED credit under USGBC guidelines.

FSC Certified tile options include Cumaru, and Ipe.

Cumaru and Ipe are very similar in color. Cumaru and Ipe will all weather naturally to a grey patina over time if left un-finished.

Cumaru and Ipe share very similar technical performance characteristics including same class ratings for durability, resistance to insects and fire.

Tropical Deck Tiles are offered with a smooth deck board surface only and are naturally slip resistant.

Grooved decking surfaces are not recommended...Why?

Grooved surfaces reduce surface area contact with shoes and are more difficult to clean. Grooves support the collection of food and dirt which encourages fungi growth further reducing slip resistance.

Tropical Deck Tiles are rated to carry a live load of 100 psf.

Tropical Deck Tiles are designed to be installed over roofs, asphalt or concrete, old decks on or in new deck constructions. Installation labor costs are lowered significantly when using modular deck panels.

Tropical Forest Products Deck Tiles are Ideal for poorly ventilated deck applications. Material and labor costs are lowered significantly when using modular deck panels.

Designed to be installed over roofs, asphalt or concrete, old decks on or in new deck constructions.

Available in 24"x24", 24"x48" and 24"x72". Smooth deck board surface.

Span 24" at 100 psf live load. Class 1 Durability / Class A Fire Rating. Static: Wet - .615FP Dynamic: Wet - .43FP

Use with TFP ProDeck Pedestals
