

UNIVERSAL VOLCANO BAY – ORLANDO, FL

PROJECT PROFILE

Cumaru was recently selected for cabana and bridge decks, stair treads and rails for Universal Studios Volcano Bay Water Park. Of interest was the determination during the design phase of the project, that when tested, smooth surface Cumaru had a higher dynamic coefficient (slip resistance) than grooved decking profiles, despite the perception of being (non-slip). Smooth decking creates more contact area between the sole of a shoe and the deck surface than grooved decking.

TECHNICAL/ENVIRONMENTAL LEAD: Brian Lotz

VOLCANO BAY – ORLANDO, FL

specification: CUMARU
application: 3x12 Cabana and Bridge Decking / Stair Treads
designer: Universal Engineering
contractor: Gulf Coast Construction

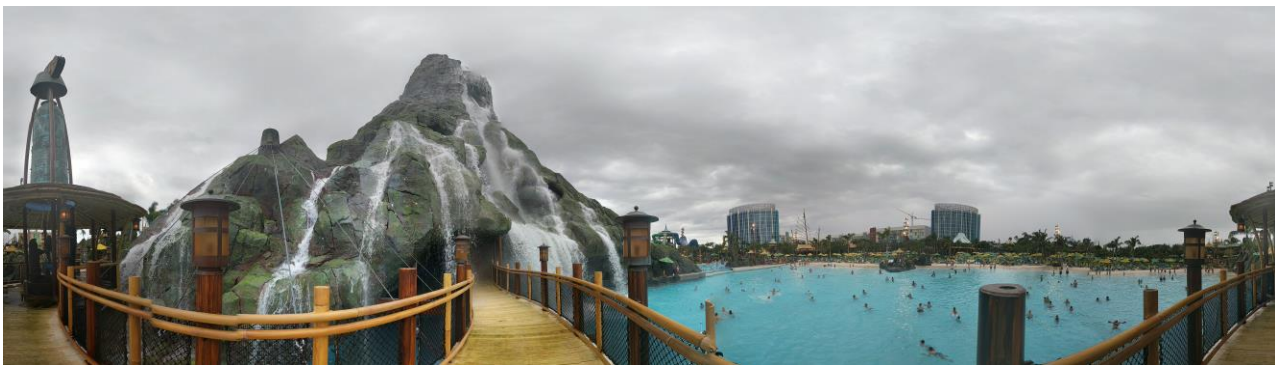

TROPICAL

Forest Products

#001 1123
